Eugen Punchenko

PHP / Laravel / Lumen / Symfony / Vue.js / TypeScript · Full-Stack Engineer

Kyiv, Ukraine · Remote via Ukrainian FOP · Open to Middle, Senior and Tech Lead roles

jenyaukraine@gmail.com | GitHub | LinkedIn | Online CV

PROFILE

Full-stack developer with 10+ years of commercial PHP experience across Laravel, Lumen and Symfony, including Symfony microframework work. I also build with Vue.js, JavaScript, TypeScript, APIs and databases. I modernise products, work hands-on with AI tools for research and software delivery, and can contribute as an individual developer or take technical ownership. My interests also span infrastructure, connected devices and creative production.

CORE TECHNOLOGIES

PHP · Laravel · Lumen · Symfony · Vue.js · JavaScript / TypeScript · REST APIs · MySQL / PostgreSQL · Docker · Linux · Git · CI/CD · AI-assisted development

PROFESSIONAL EXPERIENCE

From Feb 2020 — **TCB Hard + Software · Senior PHP Developer**
PHP platform development and modernisation. Former role; the exact end date is not confirmed in the available CV records.

Jan–Feb 2020 — **SYS Softwaresysteme GmbH · Senior PHP Developer**
Laravel backend and Vue / TypeScript frontend.

Aug 2019–Jan 2020 — **Hallo Welt! GmbH · Middle PHP Developer**
PHP development in the MediaWiki / BlueSpice ecosystem.

2019 — **Astarios · Middle PHP Developer**
MediaWiki / BlueSpice work; Docker, Tomcat and NPM in the project stack. This record overlaps the Hallo Welt! period.

Sep 2018–May 2019 — **Dyisy Ltd · Middle PHP Developer**
Laravel dashboards and marketplace APIs.

Feb 2016–Jun 2017 — **UAT-Solutions · Full-Stack Developer**
Laravel, Vue.js and MySQL product development.

Aug 2015–Jan 2016 — **Leo Studio · SEO Specialist**
Search optimisation and web delivery.

SELECTED WORK & INTERESTS

AI and software: AI-assisted engineering workflows, local model experimentation, full-stack applications, modular architecture, Vue 2-to-3 migration and multi-tenant systems. I use AI tools across research, implementation and review, with human validation.

Infrastructure and electronics: Earlier ISP and Linux administration; network troubleshooting; hands-on soldering and prototyping with ESP32, RS-485 and CAN. Personal home-automation work includes an air-conditioner integration project.

Music: I create and publish electronic music. Listen to track 1 · Listen to track 2.

INTERVIEW FORMAT

I prefer a practical, role-relevant assignment using my normal AI-assisted workflow, followed by a discussion of the work. I do not take live technical quizzes.

SELECTED PLATFORM WORK

Worked on a high-load video platform with Android and TV apps, RockPi devices, ARM, Chromium and Mali video work, and remote operation of device fleets over OpenVPN.

Selected projects

Working product screens and a physical integration prototype

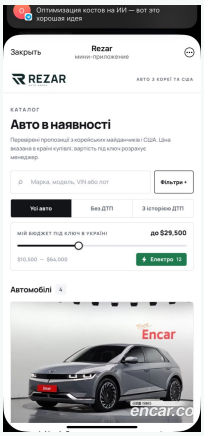

UNREAL ENGINE / C++

NeonCrown

Playable forest scene with NPCs, interaction,
HUD and game-world systems.
The photo shows the running game, not a mockup.

More projects at punchenko.de

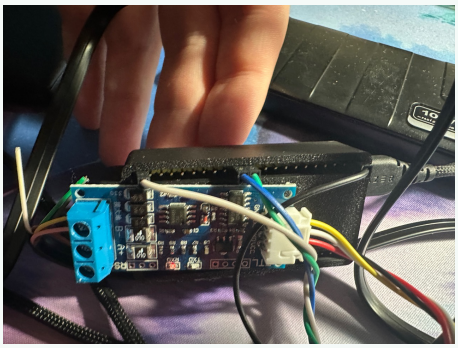

PYTHON / TELEGRAM MINI APP

Rezar

Mobile vehicle catalogue with search, filters
and an enquiry flow.
The photo shows the app on a phone.

Open the project

HARDWARE / INTEGRATION

Connected devices

Practical wiring and testing around an RS-485
module. Hardware prototyping complements
my software and device-integration work.
